

RetireWise AI: The AI Operating System for the Retirement Journey

One-Liner: The comprehensive AI platform that guides Americans through the most complex financial and life transition of their lives — from “when should I retire?” to “how do I live my best retirement.”

Date: May 20, 2026

Drop: Afternoon

Valuation Target: \$15B+ (FinTech + HealthTech + InsurTech Convergence)

The Problem

73 million Americans will turn 65 in the next decade. They face the most complex financial and life transition imaginable — with fragmented, confusing, and often predatory advice.

The retirement planning industry is broken:

The Complexity Crisis

- **Social Security:** 2,728 rules governing benefits. Time your claim wrong? Lose \$100,000+.
- **Medicare:** 60+ million plans across Parts A, B, C, D, Medigap. Average person spends 40+ hours researching.
- **Retirement Accounts:** 401(k), IRA, Roth, Required Minimum Distributions, tax optimization — one wrong move costs thousands.
- **Healthcare Planning:** Long-term care costs average \$108,000/year. 70% of retirees will need it. Most have zero plan.
- **Housing Decisions:** Downsize? Age in place? Relocate? Move closer to family? \$500K+ decisions made with gut instinct.

The Advice Gap

- **Financial Advisors:** Only 20% of Americans have one. Average fee: 1% of assets annually (\$10K+ on a \$1M portfolio).
- **Conflicts of Interest:** Advisors often push products with hidden commissions.
- **Fragmentation:** Need separate experts for taxes, Medicare, Social Security, estate planning, insurance.
- **One-Size-Fits-All:** Cookie-cutter advice ignores individual circumstances.

The Emotional Void

- **Identity Crisis:** 30% of retirees experience depression in the first year.
- **Purpose Gap:** “What do I do with myself?” is the #1 question retirees face.
- **Social Isolation:** Retirement destroys work-based social networks overnight.
- **No Support System:** Financial planners don’t help with life planning.

The result: Americans lose an estimated \$200 billion annually to suboptimal retirement decisions — and millions enter retirement anxious, confused, and unprepared.

The Solution: RetireWise AI

RetireWise AI is the comprehensive AI operating system for the entire retirement journey — integrating financial optimization, healthcare navigation, lifestyle planning, and emotional support into one intelligent platform.

Core Platform Capabilities

1. Financial Optimization Engine Social Security Maximizer - Analyzes 81 claiming strategies for couples (single, married, divorced, widowed) - Projects lifetime benefits under each scenario - Factors in health, life expectancy, other income sources - Typical optimization: +\$50,000 to +\$200,000 in lifetime benefits

Retirement Income Architect - Models sustainable withdrawal strategies across accounts - Tax-efficient drawdown sequencing (which account to tap first) - Required Minimum Distribution optimization - Roth conversion analysis and timing - Projected portfolio longevity under various scenarios

Tax Intelligence - Year-by-year tax projection through retirement - Identifies “tax arbitrage” opportunities (low-income years for Roth conversions) - State tax optimization for relocators - Capital gains harvesting strategies - Estate tax planning integration

2. Medicare & Healthcare Navigator Medicare Plan Optimizer - Analyzes all available plans in your zip code - Factors in your medications, doctors, health conditions - Projects total annual costs (premiums + out-of-pocket) - Alerts to plan changes during Open Enrollment - Handles Part D coverage gap (“donut hole”) optimization

Long-Term Care Planner - Personalized probability modeling for care needs - Insurance analysis (traditional LTC, hybrid policies, self-insure) - Medicaid planning strategies (where appropriate) - Care facility research and cost comparison - Home modification recommendations for aging in place

Healthcare Cost Projector - Models healthcare expenses from retirement to end of life - Fidelity estimate: Average couple needs \$315,000 for retirement healthcare - Personalized projections based on health profile - HSA optimization strategies

3. Life Transition Coach Retirement Readiness Assessment - Financial readiness score (can you afford to retire?) - Psychological readiness score (are you mentally prepared?) - Social readiness score (what’s your support network?) - Purpose readiness score (what will you do?) - Customized preparation timeline

Purpose & Identity Workshop - Guided exploration of post-work identity - Skills and passion inventory - Volunteer opportunity matching - Encore career exploration - Community and social connection recommendations

Relationship Navigator - Couples alignment exercises (often partners have different retirement visions) - Family conversation guides (adult children, aging parents) - Caregiver preparation resources - Social network maintenance strategies

4. Housing & Location Intelligence Age-in-Place Analyzer - Home assessment for aging needs - Modification recommendations and cost estimates - Local service availability (healthcare, social, transportation) - Property tax and maintenance projections

Relocation Optimizer - Compare locations on: taxes, healthcare, cost of living, climate, family proximity - State-by-state tax analysis (income, property, estate, Social Security taxation) - Healthcare quality metrics by region - Climate and lifestyle matching

Downsizing Decision Support - Financial analysis (sell vs. keep) - Emotional preparation resources - Timeline and logistics planning - Decluttering and moving support coordination

5. Estate & Legacy Planning Estate Plan Analyzer - Reviews existing documents for gaps and conflicts - Beneficiary audit across all accounts - Power of attorney and healthcare directive guidance - Trust vs. will analysis

Legacy Conversation Facilitator - Guided family wealth conversations - Ethical will creation (values and life lessons) - Digital asset management - Charitable giving optimization

The Technology

AI Architecture

Multi-Agent Orchestration - Specialized AI agents for each domain (Social Security, Medicare, Tax, Housing, Life Coaching) - Agents collaborate to provide holistic recommendations - Human expert escalation for complex edge cases

Personalization Engine - Ingests financial accounts, health records, preferences - Learns from user interactions and decisions - Continuously updates recommendations as circumstances change

Scenario Simulation - Monte Carlo modeling for financial projections - What-if analysis: “What if I retire at 62 vs. 65 vs. 67?” - Stress testing: “What if the market drops 40%?” - Health scenario modeling: “What if I need long-term care at 75?”

Compliance & Accuracy - Real-time regulatory database (Social Security rules, Medicare plans, tax laws) - Multi-source verification for all recommendations - Audit trail for every piece of advice - Quarterly accuracy assessments

Integration Layer

Financial Account Aggregation - Connects to 15,000+ institutions - Real-time balance and transaction data - Automatic portfolio analysis - Expense categorization and tracking

Healthcare Data Integration - Medicare plan databases (updated daily) - Prescription drug pricing APIs - Provider network data - Health record integration (with consent)

Government Systems - Social Security benefit estimator integration - IRS account transcripts - State tax authority connections

Market Opportunity

The Numbers

Metric	Value
Americans turning 65 daily	11,200
Total Boomers entering retirement	73 million
US retirement assets	\$35.4 trillion
Annual retirement planning services spend	\$500+ billion
Average suboptimal decisions cost	\$100,000+ per household
Addressable market (premium tier)	\$50B+ annually

Target Segments

Segment 1: Mass Affluent Pre-Retirees (\$500K - \$2M assets) - 25 million Americans - Currently underserved by human advisors (too small for full service) - High complexity, limited guidance - Willingness to pay: \$500-\$2,000/year

Segment 2: Emerging Retirees (Within 5 years of retirement) - 15 million Americans facing imminent decisions - Peak decision complexity (timing, healthcare, housing) - Willingness to pay: \$1,000-\$5,000/year

Segment 3: Recent Retirees (First 5 years of retirement) - 20 million Americans navigating the transition - Need ongoing optimization and life support - Willingness to pay: \$500-\$2,000/year

Enterprise/B2B Segments - Employer retirement plan sponsors (wellness benefit) - Financial advisory firms (augment their practice) - Healthcare systems (reduce costs through better planning) - Insurance companies (customer engagement and retention)

Business Model

Consumer Tiers

Free Tier: RetireWise Basics - Social Security benefit estimate - Basic retirement readiness score - Educational content library - Limited scenario modeling

Premium Tier: \$79/month (\$790/year) - Full financial optimization engine - Medicare navigator - Unlimited scenario modeling - Email support - Quarterly AI review calls

Elite Tier: \$199/month (\$1,990/year) - Everything in Premium - Dedicated AI advisor with video calls - Tax filing integration - Estate plan review - Priority support with human experts

Concierge Tier: \$499/month (\$4,990/year) - Everything in Elite - Unlimited human expert consultations - Annual in-home review (where available) - Family member accounts - Dedicated success manager

B2B Revenue Streams

Employer Platform: \$5-15 PEPM (per eligible employee per month) - White-labeled platform for retirement benefits - Integration with 401(k) providers - Employee engagement reporting - Group rates for participating employees

Advisory Firm License: \$500-2,000/month per advisor - Tools to augment human advisors - Client-facing portal - Proposal generation - Compliance documentation

Insurance Partnerships - Lead generation for Medicare, LTC, life insurance - Compliant, transparent recommendations - Revenue share on attributed policies

Competitive Landscape

Current Options (All Inadequate)

Solution	Limitation
Human Financial Advisors	Expensive (\$10K+/year), conflicts of interest, limited availability
Robo-Advisors (Betterment, Wealthfront)	Investment-only, no retirement specialization
Medicare Brokers	Narrow focus, commission-driven
Social Security Calculators	Point solutions, no integration
Retirement Books/Courses	Generic, no personalization

Our Differentiation

1. **Holistic Integration:** First platform covering ALL retirement domains
 2. **AI-Native:** Personalized recommendations at scale, not one-size-fits-all
 3. **Fiduciary Alignment:** Subscription model eliminates commission conflicts
 4. **Life + Money:** Only platform addressing emotional/purpose dimensions
 5. **Continuous Optimization:** Not one-time advice — ongoing partnership
-

Go-to-Market Strategy

Phase 1: Direct-to-Consumer Launch (Months 1-12)

Channel Strategy - SEO/Content: “When should I claim Social Security?” (1.2M monthly searches) - YouTube: Retirement planning education channel - Podcast sponsorships (targeting 50+ demographic) - Facebook/Instagram (highest 55+ engagement) - Partnerships with AARP, retirement communities

Launch Markets - Florida (highest retiree concentration) - Arizona (major retirement destination) - Texas (large population, tax benefits)

Viral Mechanics - Social Security optimization results shareable (“RetireWise found me \$87,000!”) - Referral program: 3 months free for referrer and referee - “Retirement readiness score” social sharing

Phase 2: Enterprise Expansion (Months 12-24)

Employer Channel - Target companies with large 55+ workforce - Position as employee benefit / retention tool - Reduce HR burden on retirement questions - Partner with 401(k) providers for distribution

Advisory Firm Channel - Tools for RIAs and CFPs - “Co-pilot” positioning (augment, don’t replace) - Compliance-friendly reporting - White-label options

Phase 3: Healthcare Integration (Months 24-36)

Medicare Advantage Plans - Partner with MA plans for member engagement - Reduce churn through comprehensive support - Health-integrated financial planning

Health Systems - Population health management partnerships - Reduce acute care through proactive planning - Social determinants of health integration

Financial Projections

5-Year Model

Year	Users	Revenue	Net Revenue	Notes
1	50,000	\$15M	-\$10M	DTC launch, heavy investment
2	250,000	\$75M	-\$5M	Enterprise launch, scaling
3	750,000	\$200M	\$20M	Profitability threshold
4	1.5M	\$400M	\$80M	Category leadership
5	3M	\$750M	\$200M	Platform expansion

Unit Economics (at scale)

- CAC: \$200 (blended DTC + B2B)
- LTV: \$2,400 (3-year average retention)
- LTV/CAC: 12x
- Gross Margin: 80%
- Net Revenue Retention: 115%

Team Requirements

Founding Team (First 10 Hires)

1. **CEO:** Fintech + retirement industry experience

2. **CTO:** AI/ML platform architecture
3. **Chief Retirement Officer:** CFP with deep retirement planning expertise
4. **VP Product:** Consumer fintech product experience
5. **VP Engineering:** Healthcare data integration experience
6. **VP Marketing:** DTC customer acquisition specialist (50+ demo)
7. **Head of Data Science:** Financial modeling and ML
8. **Head of Content:** Retirement education content strategy
9. **Head of Compliance:** Securities and insurance regulation
10. **Head of Partnerships:** Enterprise sales experience

Advisory Board

- Former Social Security Administration executive
- Medicare policy expert
- Leading longevity researcher
- Prominent retirement researcher (academic)
- Former 401(k) provider executive

Risks & Mitigations

Risk	Mitigation
Regulatory complexity	Deep compliance investment, state-by-state licensing
Incumbent response	Move fast, build brand loyalty, network effects
AI accuracy concerns	Human expert backstop, conservative recommendations, transparency
Customer acquisition costs	Content-led growth, employer channel, referral mechanics
Data privacy concerns	SOC 2, zero data sales, privacy-first architecture

Why Now?

1. **Demographic Tsunami:** 10,000+ Boomers turning 65 daily — the largest retirement wave in history
2. **AI Maturity:** LLMs finally capable of nuanced financial and life advice
3. **Trust in Traditional Advisors Declining:** Scandals, conflicts, and high fees driving demand for alternatives
4. **Healthcare Complexity Exploding:** Medicare options have tripled in 10 years
5. **Longevity Increasing:** 30+ year retirements require sophisticated planning
6. **Economic Uncertainty:** Market volatility, inflation, and Social Security concerns drive planning urgency

The Vision

RetireWise AI will become the trusted partner for every American's retirement journey — democratizing access to sophisticated planning that was previously available only to the wealthy.

We're not building another robo-advisor or calculator. We're building the operating system for a 30-year life chapter that 73 million Americans are about to enter.

When someone asks "Am I ready to retire?" — RetireWise will have the answer.

When someone wonders "What should I do with my life?" — RetireWise will help them discover it.

When someone faces Medicare enrollment, Social Security claiming, or a housing decision — RetireWise will guide them through with confidence.

This is the AI companion that turns retirement anxiety into retirement confidence.

Call to Action

We're raising a **\$25M Series A** to: - Build the core AI platform - Launch in 3 pilot markets - Achieve 50,000 paying users - Establish enterprise partnerships

The retirement planning industry is a \$500B+ market waiting to be disrupted. The time is now.

"Retirement is the beginning of life, not the end. RetireWise ensures you're ready for both the finances and the adventure."
